Who we are

Avalon Employment has been securing paid & meaningful employment in St. John's and surrounding areas since 1992. As a non-profit organization that offers services for persons with barriers to employment due to developmental disabilities, we not only serve the individuals that seek our services, but also the business community.

Our organization and its team of diversity and inclusion professionals seek to:

- Identify, promote, and support priorities for sustainable and long-term employment;
- Identify employment opportunities across the region as requested by clients;
- Influence government policies, regulations and programs to improve the climate for long term employment of individuals with barriers to employment; and,
- Support and provide on going maintenance as required to ensure the continued employment of our clients.

Our Services

Autism Employment Program

Our award-winning Autism Employment Program helps individuals on the spectrum build employable skills and navigate the social nuances in the every-day workplace. Our team will work with the individual to seek employment and also be offered short-term employment support to help them adjust to their career.

Supported Employment

Our team will work with the individual to assess their strengths and then begin searching for a job on their behalf; we will also work with the individual to build their resume, prepare for an interview, and potentially hire a Job Coach to offer one to one, individualized job maintenance and support.

MentorAbility

MentorAbility is a national mentoring program for individuals with any disability. Our Regional Coordinator will work closely with the job seeker to identify their career goals and aspirations to facilitate a rewarding mentoring experience with a professional from their industry of interest.
